

Kishore P

Full Stack Developer

kishoremala2434@gmail.com | +91 63820 19441 | Chennai | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Motivated Full Stack Developer with hands-on experience in Java, Spring Boot, SQL/PL/SQL, and Angular, seeking an entry-level role to design and develop scalable, end-to-end web applications. Adept at building RESTful APIs, managing relational databases, and crafting responsive front-end interfaces. Passionate about clean code, problem-solving, and contributing to collaborative, agile development teams.

EDUCATION

Ramco Institute of Technology, Rajapalayam

2022 – 2026

B.E. Electronics & Communication Engineering

CGPA: 7.83 (up to 7th Sem)

Sri Vikasa Vidhyalaya Matric HSS, Uthamapalayam HSC: 80.6% (2022) | SSLC: 90.4% (2020)

TECHNICAL SKILLS

Programming Languages: Java (Core Java), SQL, PL/SQL, Python, C

Front-End: HTML5, CSS3, JavaScript, Angular, Bootstrap

Back-End: Java (Spring Boot Basics), RESTful APIs, JDBC

Databases: SQL / PL/SQL — queries, joins, stored procedures, indexing, triggers, cursors, exception handling, views

Tools & IDEs: VS Code, Eclipse, MySQL Workbench, Git, GitHub

Concepts: OOP, DBMS, Data Structures & Algorithms, MVC Architecture

PROJECTS

BMW Webpage Clone

HTML | CSS | JavaScript | Bootstrap

- Built a fully responsive front-end clone of the official BMW website with pixel-accurate layout, navigation bar, hero section, and car model showcase pages.
- Used Bootstrap grid system and custom CSS animations to ensure seamless responsiveness across desktop and mobile devices.
- Implemented interactive UI elements like image carousels, hover effects, and smooth scroll using vanilla JavaScript.

Pneumonia Detection Using AI/ML

Python | TensorFlow | Keras | OpenCV

- Developed a deep learning model to detect pneumonia from chest X-ray images using Convolutional Neural Networks (CNN) with TensorFlow and Keras.
- Pre-processed and augmented the dataset using OpenCV and NumPy to improve model accuracy and reduce overfitting.
- Achieved high classification accuracy (93.57%) by training on the Kaggle chest X-ray dataset, with results visualized through confusion matrices and accuracy/loss plots.

Student Management System

Java | MySQL | JDBC

- Built a full-stack Java application to manage student records (add, update, delete, view) using OOP principles and MVC-like architecture.
- Designed SQL schemas with normalization, wrote complex queries and stored procedures; integrated MySQL via JDBC for efficient data storage and retrieval.

CERTIFICATIONS

OOP in Java — Coursera (2024) | Artificial Intelligence — CodeC (2024) |

Google AI Essentials — Google (2024)

LANGUAGES

English (Professional) | Tamil (Native)
